DNA

Leonardo Rossano & Debora Mansur

Ispirata dalle forme dinamiche della biogenetica, la panca modulare DNA consiste in un singolo elemento in multistrato di legno curvato, assemblato specularmente. Il risultato è un avvolgente elemento d'arredo dalla particolare forma ad elica, ad ogni passo della quale corrisponde una seduta opportunamente separata dalle altre. La struttura in legno può essere completamente a vista o rivestita nella sua parte anteriore.

La nuova versione a elementi curvi permette di creare composizioni originali, ad arco o a "S".

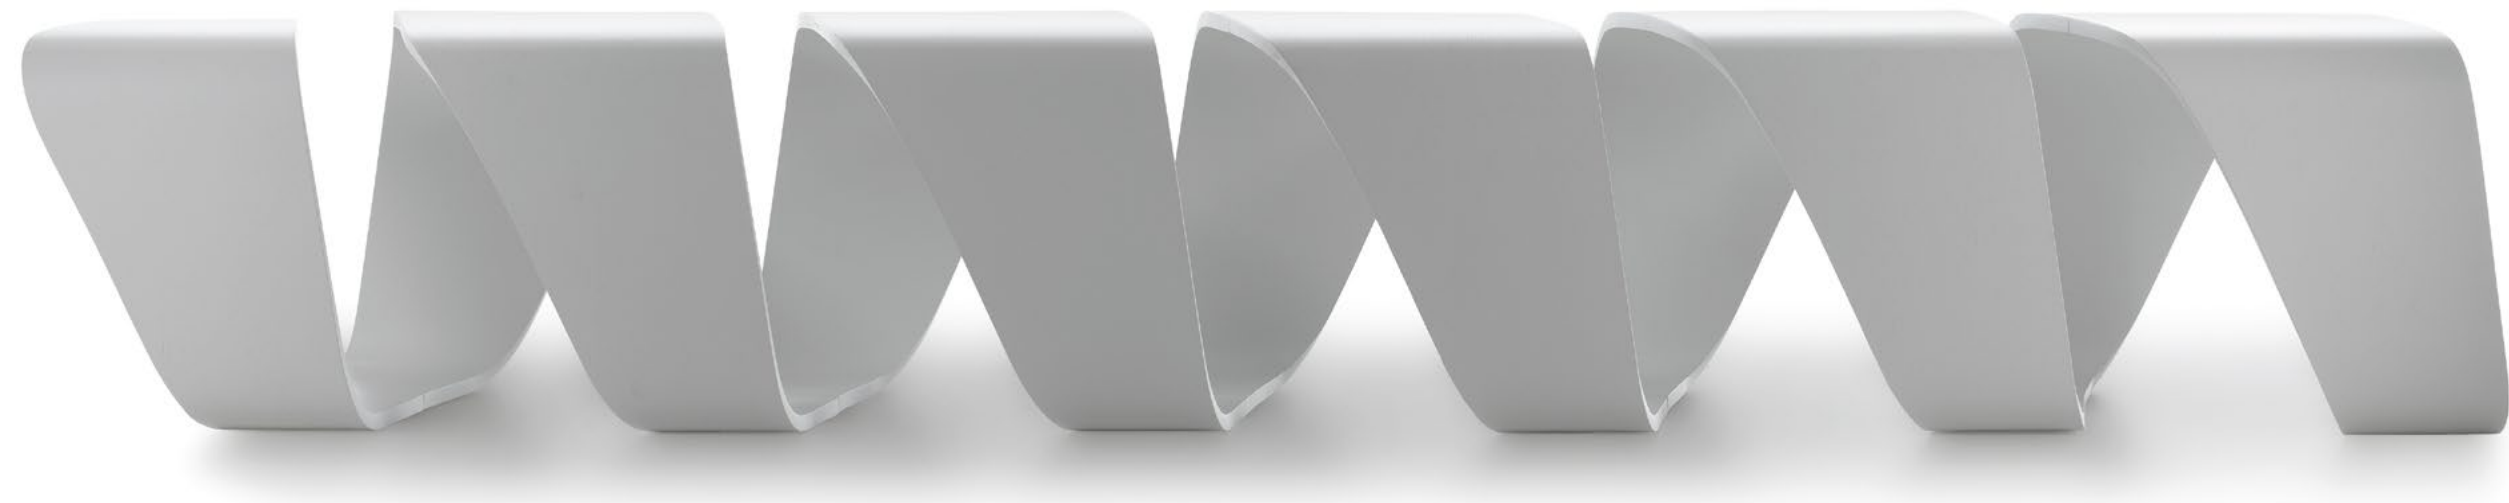

Inspired by the dynamic forms of biogenetics, the modular bench DNA consists in a unique construction assembly that is created by a single section of curved plywood, which is mirrored in design to create multiple seating configurations. The result of this system is a captivating piece of furniture, shaped after the helix form in which each completed section creates an individual seat for the user creating comfort in a public space. The wooden structure can also be upholstered on its front side. The new version of DNA with curved elements allows to create original composition, arch or "S" shaped.

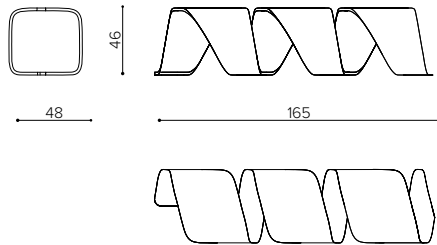

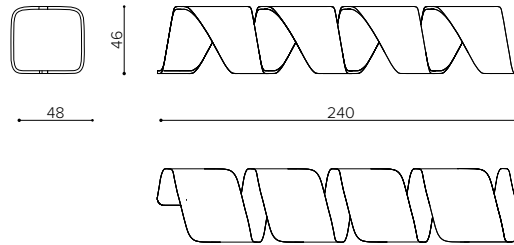

DN 3000

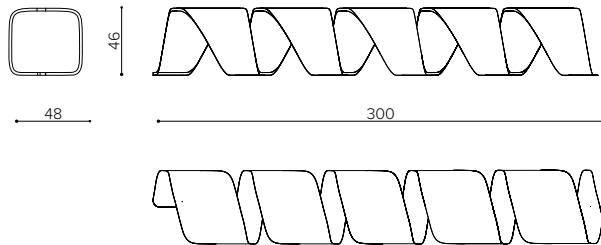

panca 3 posti • 3 seater bench

**DN 4000**

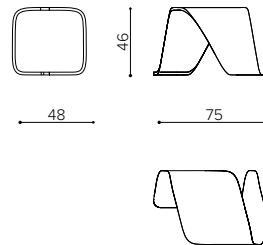

panca 3 posti • 3 seater bench

**DN 5000**

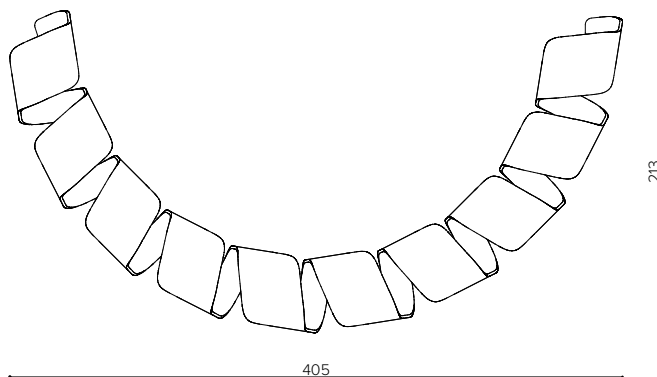

panca 3 posti • 3 seater bench

**DN 1000**

modulo posto extra • extra seat module

**DN 10RO**

panca curva • curved bench
